

MAHAR TOOL SUPPLY COMPANY

Resharp/Repair Program

Resharpen, Repair, Coating, and Management of
Repairable Tools

- **Regrind:** Extend the life of round tools for a greater cost savings.
- **Coating:** Recoating resharpened tools returns tool to a “like new” state.
- **Management:** Mahar Tool Supply can manage your inventory, utilizing regrinds versus new tooling to reduce your spend and refill your float level with new tools once regrinds reach their total life to avoid machine downtime.
- **Repair:** Mahar Tool Supply offers repair services on cutter bodies, fixtures, gages, spindles, & other related tooling needs to save money on durable goods.
- **Support:** Mahar Tool Supply currently has Regrind/Repair programs in place to support our customers , and we have expert Cutter Grinders & Machine Programmers on staff to support your needs.
