

# MAHAR TOOL SUPPLY COMPANY

## Vending/Scanner Program

Cutting Tool, Gage, Safety, and MRO Management & Procurement through Vending/Scanner Solutions

- **Benefits of vending:** Secure inventory, automatic replenishment, track usage, accountability of tools, accessible 24/7, real-time information.
- **New to vending?:** Mahar works with a number of vending companies to find the solution that works best for your business.
- **Existing Program?:** Mahar can take over any existing vending solution & help streamline the process from replenishment to put away to reporting.
- **Management:** Mahar Tool Supply can manage your inventory using vending or scanner solutions. Mahar can integrate the information flow with our system for total replenishment & usage tracking. Our tech team can then analyze these usage patterns to offer you the right solutions for greater cost savings, lower CPU, and elimination of bottlenecks in the manufacturing process.
- **Support:** Mahar Tool Supply currently has Vending/Scanner programs in place supporting our customers worldwide. We have experience with SupplyPro, Winware/CribMaster, Ingersoll Matrix, Autocrib, Apex, Kennametal ToolBoss, Nexiant, as well as our own scanner solution.
